Internet and Web Programming
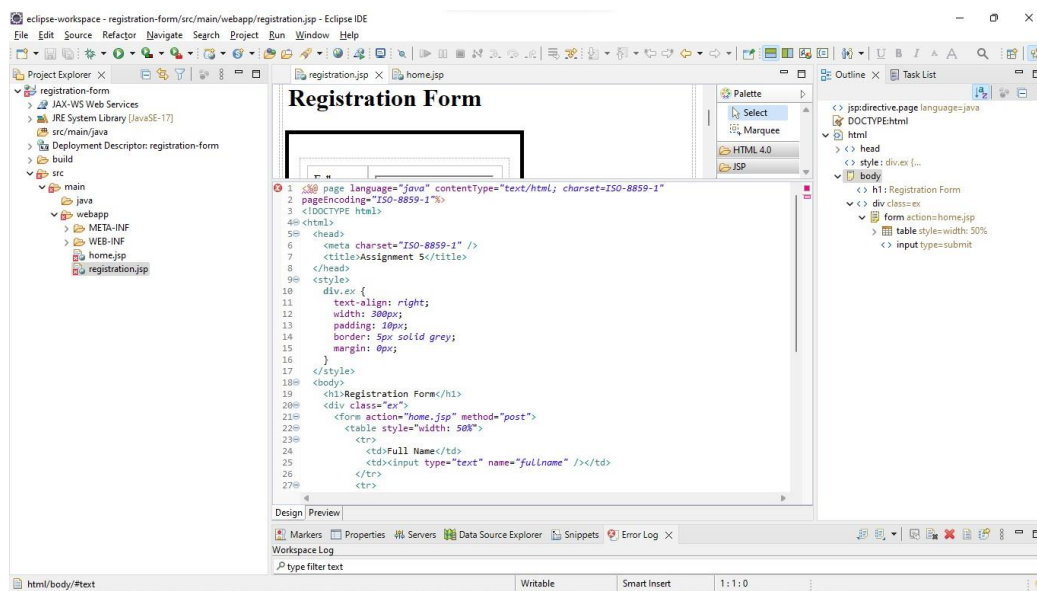

18BCS108

Aim:

To develop a JSP form to collect user registration details.

Procedure:

- Create repository and create webpage using Eclipse IDE.

- Check out form on Eclipse IDE

Registration Form

Full Name	
Username	
Password	********
Address	
Age	
	register

- Upload to GitHub using your SCM tool.

Output:

Registration Form

Full Name	
Username	
Password	********
Address	
Age	
	register

Result:

Thus, we have developed a JSP form to collect user registration details.
